

FUEL MANAGEMENT

BLEND FUEL WITH ACCURACY
AND CONTROL

Fuel Blend Management by AGI

Blend Fuel with Accuracy and Control

AGI provides innovative bio blending management solutions that are easy to use and specially designed to reduce errors and provide pinpoint accuracy at your truck stop, bulk plant or off terminal site.

Bio Blender™

A continuous blend system acts as a biodiesel calculator for simple product blends: accurately mix bio and diesel or heating oil.

Fuel Manager™

Continuous blend system with the ability to inject additives: premium and winterizers. System includes an easy to use touchscreen and accurate accounting records of every transaction.

Junge Injector™

The smart solution for pulse blending additives. It can adjust the injection rate of the additive to the blend of bio or diesel made and has the ability to quickly change rates, such as a 2X rate for a winter additive.

Bio Blender Max

Controls the ratio of bio to fuel so you can blend any percent of biodiesel or ethanol. This continuous injection blending system shifts flow from zero to full seamlessly. Variable speed pumps and pulsing assures proper blending every time.

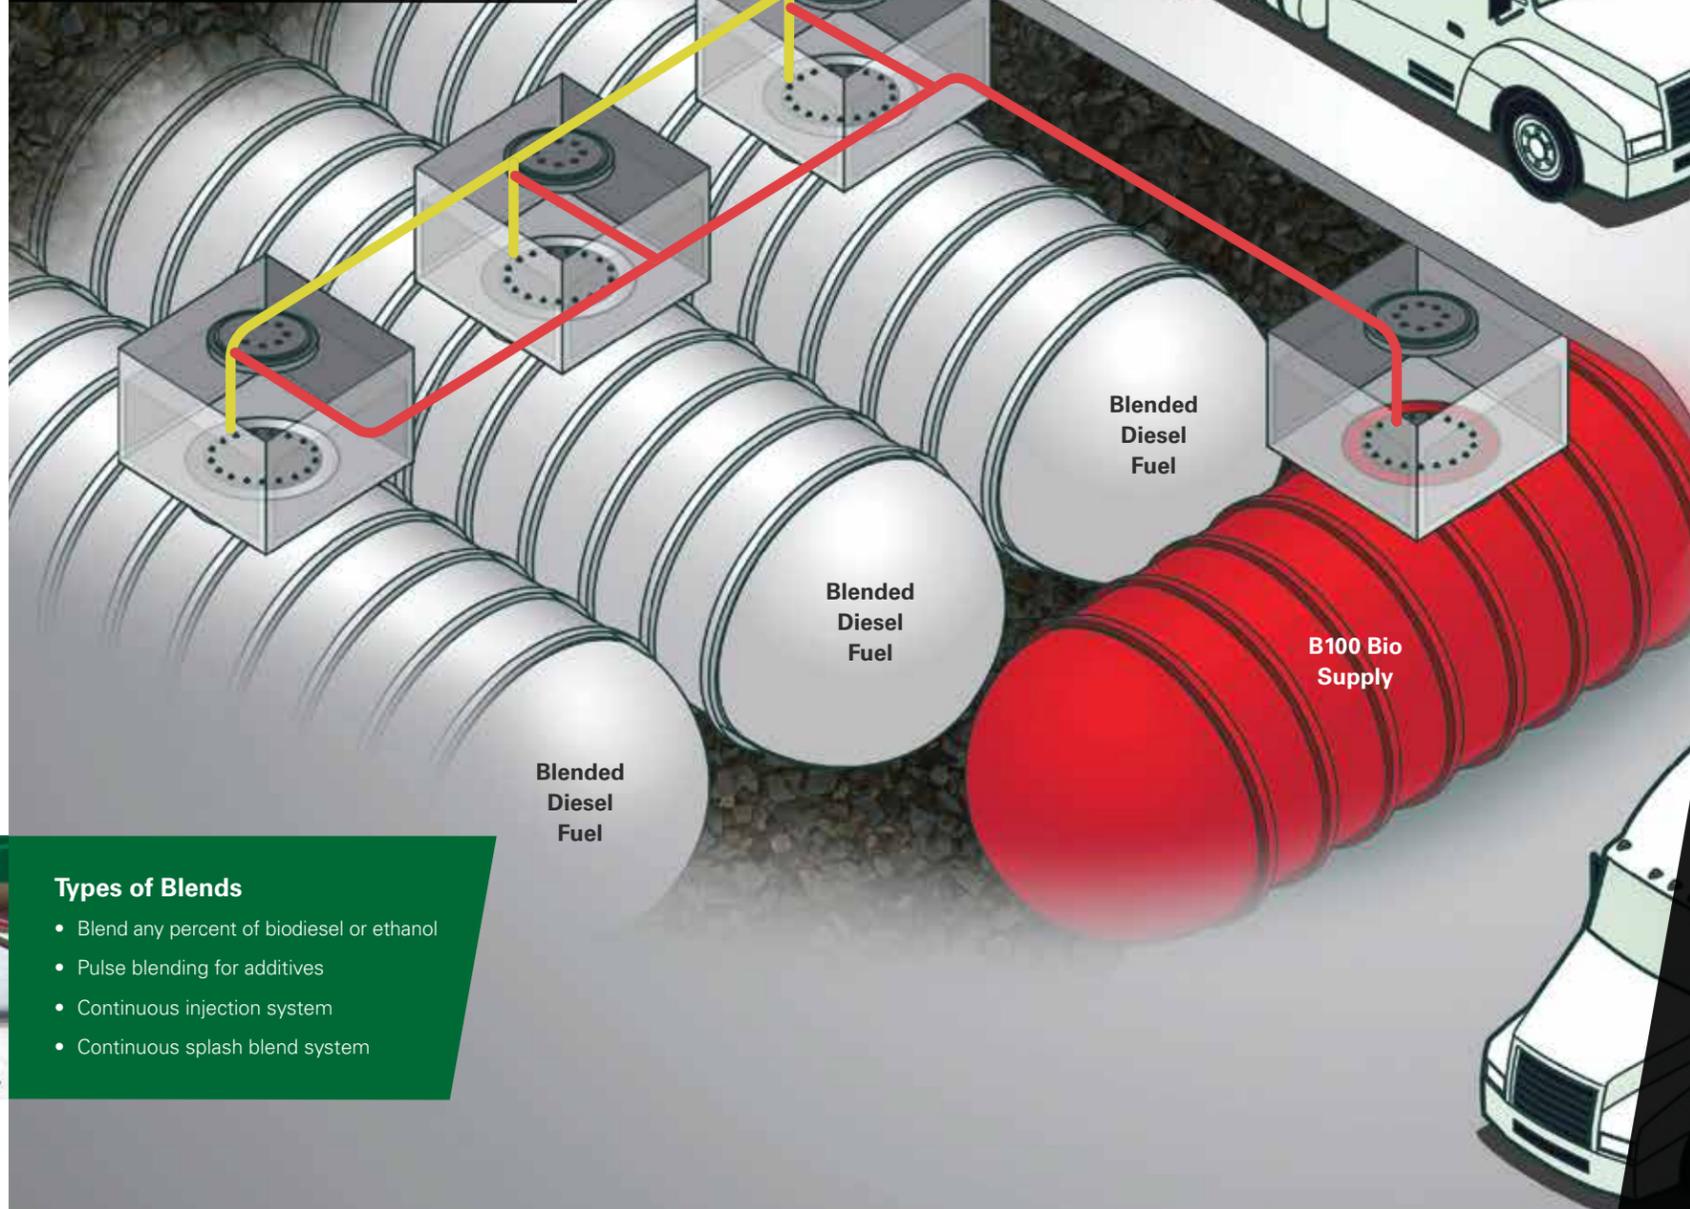

BIO BLENDER™

Continuous Ratio Blend System

- Automated biodiesel blending system
- Fast and easy product blending
- Accurately and easily mix bio and diesel or heating oil

All Amounts Are In Gallons

Continuous Injection Blending System

- Skid mounted (controls are unattached)
- 5 position switch to select bio ratio (programmable)
- Data records easily accessed via Internet or network
- Continuous, in line blending with pulse at very low concentration rates
- Installed and serviced by local contractors

FUEL MANAGER™

Bulk Terminal Load Out

- Automatically computed blend formulas - no missed mixes
- Install new or retrofit to existing systems
- Reduce inventory and tanks
- Remote reporting to distant locations - in real time

Pulse Blending for Additives

- Adds premium additives, winter additives, or dyes to fuel
- Ability to change rates between truck compartments
- Automatic additive injection
- Easy to program for your products
- Accurate calibration

- ### Types of Blends
- Blend any percent of biodiesel or ethanol
 - Pulse blending for additives
 - Continuous injection system
 - Continuous splash blend system

AGI FERTILIZER SYSTEMS is an AGI Brand.

AGI is a leading provider of equipment solutions for agriculture bulk commodities including seed, fertilizer, grain, and feed systems with a growing platform in providing equipment and solutions for food processing facilities. AGI has manufacturing facilities in Canada, the United States, the United Kingdom, Brazil, India and Italy and distributes its products globally.
