X SERIES

It's not an ordinary auger... It's a Westfield

AGI Westfield is committed to providing farmers with augers they can trust.

The X Series is the latest addition to the AGI Westfield Portable Handling line. With a precision engineered, commercial strength, scissor-lift frame and low profile hopper, the X Series offers unmatched serviceability and X-treme durability.

Durable

The X Series features a powder coat paint to protect the finish and reduce rusting over time. Wear Edge Technology™ has been added to the flighting at critical wear points giving an extra layer of steel that is welded to the edge of the flighting so it lasts longer and needs to be replaced less often.

Efficient

The X Series uses square, one-bolt flight connections to ensure the flighting maintains proper alignment for smooth operation. The upper flight thrust adjuster equalizes the pressure between the upper and lower bearings during operation. This extends the life of the lower boot bearing. The CV PTO reduces vibration and provides maximum power transfer to the auger in order to maintain the life of the unit without sacrificing capacity. The large boot and tapered boot flight maximize auger capacity at all angles by efficiently channeling grain from the hopper into the auger.

Convenient

The removable slip-on boot flight uses Wear Edge Technology™ and can be quickly replaced without having to remove and replace the entire lower flight. The X Series features six easily accessible service points to allow for quick maintenance of U-joints, chains, bearings, and gearboxes. The U-joint end caps have external grease zerks, making it easy to service and maintain. Tool-free inspection areas include, the hopper chain cover, neck transition, boot clean-out and swing head cover. The large clean-out, service points, and access panels allow for fast and efficient auger cleaning and servicing.

FEATURES

Powder Coat Paint

AGI Westfield uses a premium powder coat on all painted parts for durability and a great looking finish that lasts and repels rust.

Grease Zerks

External grease zerks on all U-joints for ease-of-maintenance.

Wear Edge Technology™

Continuous 10-gauge steel is welded to flighting edge where most of the wear occurs to extend the life of the flighting. Standard on all AGI augers at critical grain transfer points, including the hopper, boot and incline flight.

Tapered Boot

The large boot and tapered boot flight maximize auger capacity at all angles by efficiently channeling grain from the hopper into the auger.

Square Flight Connection

Square, one-bolt flight connections provide improved performance through positive torque transfer.

X10 & X13

X10 up to 6,600 bph | 63' 73' 83' **X13** up to 11,000 bph | 74' 84' 94'

Trussing & Frame

The X Series uses a scissor lift frame with cross members to maximize reach and reduce swaying, keeping the auger in place once it has been positioned at the bin. Heavy-duty cable trussing is used on smaller models. However, for longer, heavier models, AGI Westfield uses commercial strength steel trussing. Trussing acts like the backbone of the auger and keeps the tube and flighting aligned, making set up at the bin easy.

Hopper + Hopper Lift Arm

The low profile hopper features left and right hand flighting to pull grain toward the center of the hopper so it flows efficiently up into the tapered boot – maximizing capacity and minimizing unload time. The 6" rubber extension along the edge of the hopper prevents grain from splashing. The hopper lift arm and hopper can be positioned on the left or right hand side of the auger, offering the convenience of unloading from either side.

OPTIONAL FEATURES

Hopper Options

A hydraulic or remote Power Swing is available for the X10 and X13. The GULP² drive over hopper is available for the X13. Also available for the X13 is the X-Tend, a retracting swing auger.

Hydraulic Hopper Winch

The hydraulic hopper winch allows the user to raise and lower the auger with ease.

Working Light Kits

When the sun goes down, LED working lights provide enhanced lighting conditions at the hopper, axle, and tube discharge to bin.

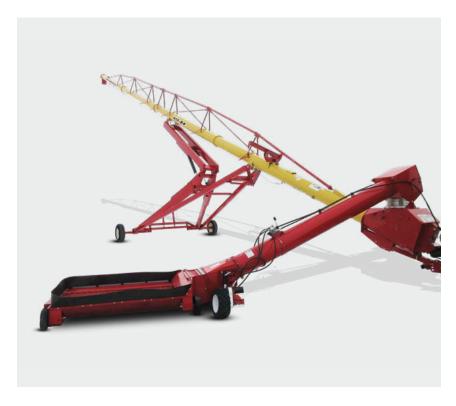

Right Angle Drive

When working in a small space, the right angle drive allows the auger to be positioned at a 90-degree angle from the truck.

Reducer-Reverser

Required for 1,000 RPM tractors to reduce the speed to 540 RPM required for an auger.

The reversing feature allows the flight direction to be reversed for quick and easy clean-out, saving time when moving from one commodity to the next. The reverser kit is also available on its own, without the speed reducer.

Power Swing

Hydraulic and Electric Remote

Hydraulic Hopper Winch

Get the job done faster with AGI Westfield's newly designed Power Swing. Available in 12V Electric or Hydraulic drive and features:

- Two-wheel drive design and large lug tires for maximum traction and balance
- Mounts easily to X Series low profile hopper
- Minimal height adjustment needed when using different heights
- Redesigned scissor lift to adjust wheel traction

Hydraulic Power Swing

- · Hydraulic drive moves the swing hopper
- · Convenient tube mounted control valve
- Complete with hydraulic hoses

Remote 12V Electric Power Swing

- Heavy-duty 12V motor
- Position hopper from cab of truck
- Large "easy grip" remote

GULP²

X13 up to 11,000 bph | 74'-94'

Drive Over Hopper

The GULP² transports with your X13 auger and is easy to deploy, without having to detach or reposition multiple pieces of equipment. The GULP² has a drive over height of just 4.5" and a large catchment area. The GULP² is designed to match the X13 auger capacity. The $GULP^2$ features precise placement at your fingertips. In most cases you only need to get out of your truck once for unloading. The hydraulically controlled power swing raises, lowers and positions the GULP² with minimal time and energy. The system comes fully integrated and ready to use.

X-Tend

Retracting Swing Auger

AGI Westfield's retracting swing auger offers the convenience of being able to extend, swing side-to-side and retract, without having to move or reposition the truck. The X-Tend was designed to work with the X13. It's fast and convenient!

FEATURES

- Low profile hopper positions under grain trailers with ease
- Hydraulic power swing with large lug tires, allow for precise positioning and maximum traction
- Dual flighting channels grain flow into the swing tube matching the capacity of your X13 auger

Note: The X-Tend is also available on the AGI Westfield MKX line of A-frame augers

AGI WESTFIELD

WESTFIELD is an AGI Brand.

AGI is a leading provider of equipment solutions for agriculture bulk commodities including seed, fertilizer, grain, and feed systems with a growing platform in providing equipment and solutions for food processing facilities. AGI has manufacturing facilities in Canada, the United States, the United Kingdom, Brazil, South Africa, India and Italy and distributes its products globally.
