6", 8", 10" & 12" Plastic 60° Spout Assembly Instruction Sheet

Step 1. Place the reinforcement bars under the bottom side of the plastic spout’s side flanges.

Step 2. From the bottom side, use the 5/16" x 1 3/4" bolts to go through the holes and attach the backband over the auger tube’s discharge hole. Tighten it down using the 5/16" nuts supplied in the kit.
