SUPPLEMENTAL INSTRUCTIONS

WIND GUARD MOUNTING INSTRUCTIONS

NOTE Use this sheet in conjunction with the Wind Guard Assembly Section of the appropriate Owner’s and Operator’s Manual supplied with the equipment.

1. Using 1/4" x 3/4" (grade 5) serrated head hex head capscrews and tinnerman nuts, fasten the wind guards to the appropriate support structure. The support structures are the inlet assembly, the discharge assembly, the drive assembly and the return roller supports.

2. Bolt the center flanges of each right hand wind guard to its adjoining left hand wind guard, using 1/4" x 3/4" hex head capscrews with flat washers and hex lock nuts.
