

PRODUCT **RELEASE**

HEAVY DUTY POWER SWEEP

AGI Hutchinson is proud to introduce a new version of our 8" and 10" Heavy Duty Power Sweep. These units include extendable sweep flight for adjusting the end wheel close to the bin wall. It also includes a floating end wheel bracket, a true rack and pinion for all gate controls and a lower gearbox with an internal clutch. The extended wear "EW" flight will be the standard option for these unloads. The sweep shield has been redesigned to be more rigid and be able to span larger bins without the need for a sweep carrier until bin diameters of 72' and larger.

FEATURES

- 8.5 to 1 Wheel Reduction
- 2 to 1 Overall Reduction with both gearboxes
- Internal Clutch Mechanism
- Adjustable floor brackets on center well
- Weld-on wells only
- 30' to 78' Bin Diameters
- Horizontal, 25 Degree, Vertical Powerhead Options
- ¼" Unload and ¼" Sweep Flight
- EW package standard (AR200)
- 12 ga. Unload Tubing
- Expandable Flight and Shield +/- 9" from standard design
