

DOUBLE RUN GRAIN PUMP CORNERS

AGI Hutchinson is proud to introduce 30- and 45-degree corners to the double run grain pump product line. The new corner options will continue to increase your flexibility and applications use for the double run grain pump. We kept maintenance and clean-out simple by using a split sprocket and two removable panels for quick and easy access.

FEATURES

- 8", 10" and 12" Diameters
- 7 GA Construction
- Upper and Lower Access Panels
- Split Square to Round Transitions
