2023 NEW DRYER ACCESSORIES

EXHAUST TEMPERATURE MONITORS

How it works
• Sensors are spaced out along the exhaust ducts to monitor exhaust temperatures
• Temperature settings are adjustable to suit different crops

Key features
• Can indicate hot spots in the dryer
• If a sensor notices a hot spot, it will turn the dryer off

Installation
• Easily retrofitted to existing dryers
• Installed during assembly for new dryers

FAN SHROUD

How it works
• Protects the fan so nothing gets caught in it
• Prevents exhaust steam from settling on the blowers and creating ice which would turn the blower off

Key features
• Contains heat, increasing thermal efficiency during longer run times

Installation
• Easily retrofitted to existing dryers
• Installed during assembly for new dryers
