

# DECLINING WEIGHT VOLUMETRIC BLEND SYSTEM

# Versatile, Fast, & Accurate Blending by AGI Fertilizer Systems

The Declining Weight Blend System has revolutionized the fertilizer blending industry. Because of its 304 stainless steel base construction and unlimited versatility, the Declining Weight Blend System is the fastest, most accurate multi-feed blend systems available.

## AUTOMATED

Once the blend formulation is entered into the electronic keypad, the PLC computer sends the rate information to the proper rotors, then continuously monitors the RPMs to ensure accurate blends.

- Stainless Steel Load Cells
- Load Cells Supervise Output of Rotary Valve

## HOPPERS

The modular design allows easy add-ons creating a system with a variety of hopper sizes.

- Sizes vary from 1.5 ton to 30 ton capacity

## METERING PRODUCT

Rotary Valve, Flat Wire Chain and Metering Augers have the capacity of metering in ounces-per-minute up to tons-per-hour.

- Stainless Steel Construction
- Variable Speed Control
- Easy to Clean

## INVENTORY SOFTWARE

The most recent update of our inventory software is able to provide a view of the whole plant's operation by monitoring the material consumption along with overall productivity.

**AGI FERTILIZER SYSTEMS is an AGI Brand.**

AGI is a leading provider of equipment solutions for agriculture bulk commodities including seed, fertilizer, grain, and feed systems with a growing platform in providing equipment and solutions for food processing facilities. AGI has manufacturing facilities in Canada, the United States, the United Kingdom, Brazil, South Africa, India and Italy and distributes its products globally.
