

# 5 HAND SAFETY TIPS

**AGI SAFETY WEEK**

## HAND SAFETY TIP 1

Choose the glove that best protects against the hazards you are likely to encounter.

## HAND SAFETY TIP 2

Make sure tool handles extend across the entire palm to avoid pinched nerves.

## HAND SAFETY TIP 3

When using tools like pliers or wire cutters make sure handle spread – distance between fingers and palm – is minimal.

## HAND SAFETY TIP 4

Select power tools with trigger switches for middle finger or thumb to balance tools and relieve finger stress.

## HAND SAFETY TIP 5

Limit exposure to high vibrating tools to avoid circulation damage, pinched nerves and tendon stress.

**EVERYONE HAS A  
HAND IN SAFETY**
