

AGI Structural products

AGI structural products include the towers, catwalks, stairs, ladders, platforms, and support systems that connect and support material handling equipment throughout your facility. Built for demanding grain, feed, fertilizer, and industrial applications, these systems help create safe, serviceable access around the equipment your operation depends on.

Faster installation

Reduce onsite labor, shorten installation times, and simplify project execution.

- Reduced field modifications
- Flexible configuration options
- Optional 10 ft tower sections

Better access

Create a structure that's easier to navigate, inspect and maintain.

- Chevron bracing option
- Multiple walkway material options
- Configurable platforms and landings

Built for the long haul

A durable structural platform designed to support your operation today as well as future growth.

- Heavy-duty structural design
- Industry-standard structural materials
- Standardized component design

A structure designed to support current needs and future expansion.

Safety-focused design

Modern structural design principles help support safety, compliance, and long-term performance.

- Designed to current LRFD standards
- OSHA-focused design

AGI

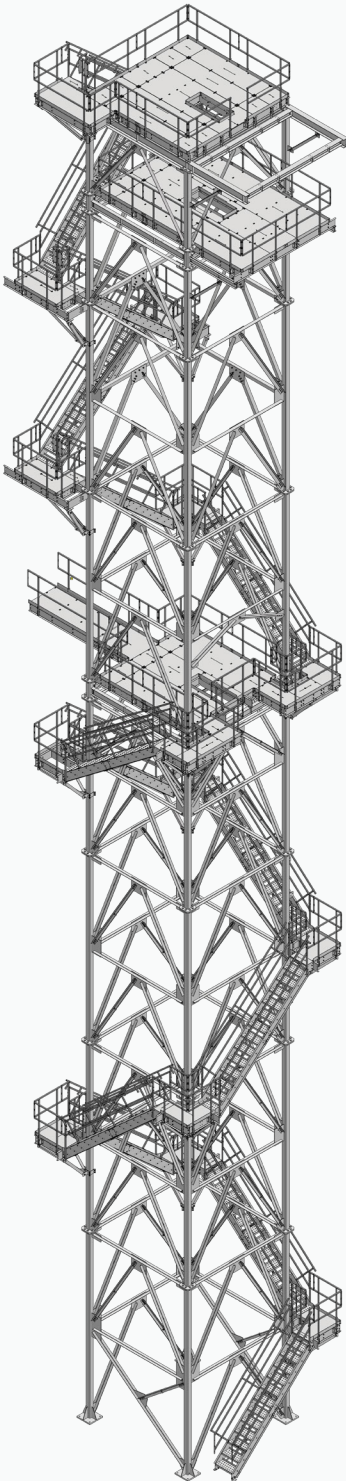

Structural products

Designed to reduce installation challenges, improve access, and support the future growth of your operation.

Standard square tower sizes

- 2' (610mm) | 4' (1219mm)
- 6' (1829mm) | 8' (2438mm)
- 10' (3048mm) | 12' (3658mm)
- 14' (4267mm) | 16' (4877mm)

*2 ft only for rectangular tower
**See AGI rep for quotes on rectangular towers and towers with sides 20ft and above

Catwalk sizes
5 to 9 ft wide w/ 42" post height

Group	Span (ft)	Total Conveyor load (lbs)
0	5-30	
1	35-50	220-425
2	55-75	185-425
3	80-100	294-460
4	105-125	

**See AGI rep for quotes on catwalks over 400lbs/ft and greater than 125ft spans
